

Gilbarco POS update for PayPal/Venmo QRC

A. Follow instructions to update POS configuration

1. Log in to Manager's Workstation
2. Navigate to Setup\Network\Mobile Payment\ Mobile Payment Configuration
3. Select QR Code Prefix / Conexxus QR Code Prefixes tab

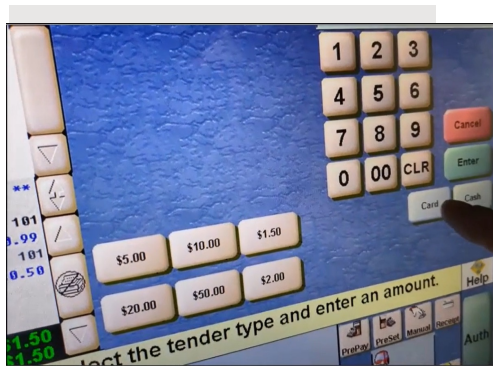

- ✦ Click **Add** and enter "79" in the "QR Code prefix" or "Conexxus QR Code Prefixes" field
- ✦ Click **Add** and enter "89" in the "QR Code prefix" or "Conexxus QR Code Prefixes" field
- ✦ Select **Save** to exit setup

If you have an issue with this step, please contact the GILBARCO Help Desk: 800-800-7498.

B. Validate above changes by initiating the PayPal Scan flow

STEP 1

Ring up item and select "TENDER" and then "CARD".

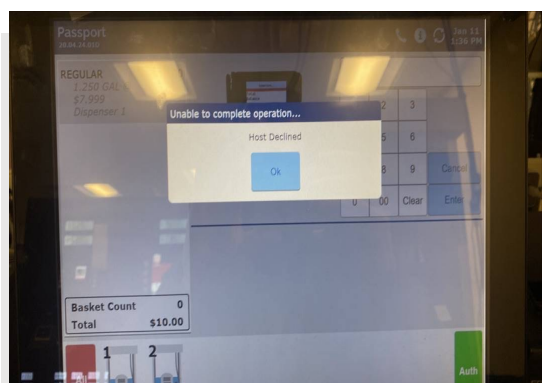

STEP 2

Scan the Expired PayPal QR Code below

STEP 3

Validate the following message is received "Host Declined" or "Program Declined"

Note: If you receive the following message:

"unknown/invalid card"

please return to the first step as the POS update must be corrected.

Please email P66CAT@p66.com to confirm completion of the POS update.

If you have an issue with the Validation of the POS update, please contact +1-833-385-2740 or email P66CAT@p66.com
